

**Job Title:** Mobile Application Developer

**Job Location:** Remote/Potential of up to 25% client travel

Agilea Solutions is a rapidly growing, energetic consulting company with a fun, fast-paced team environment. In this innovative company you will bring us your passion to develop, your strong technical skills, and we will provide you with the opportunity to deliver solutions for the largest companies in the world (Fortune 100). We help clients ensure their Workforce Management (WFM) systems can respond to rapidly changing business needs and deliver more effectively. Timekeeping, Time Off management and Scheduling are not only key components of WFM systems, but they are crucial business processes for our enterprise clients. Agilea Solutions delivers client projects using Agile methodologies, where we focus on delivering value to users by building in an iterative, collaborative manner, while seeking continuous improvement.

**Our Mission:** To provide our clients with innovative solutions that accelerate business agility and speed to market.

**Position Summary:**

The Mobile Application Developer is responsible for providing technical expertise, leadership and execution throughout the software development lifecycle including analysis, design, development, testing and release. This position requires the ability to coordinate with other team leads and business analysts to map process flows to technology solutions and with enterprise architects on issues of system integration, compatibility, and performance.

**Essential Duties & Responsibilities:**

- Participate in the various stages of product development life-cycle (concept, design, development, deployment)
- Create, prototype and implement UI designs
- Collaborate with cross functional teams to define and design applications
- Ability to manage multiple tasks, work in a team environment, understand and be responsive to project and customer needs
- Ability to estimate time required to complete a task, communicate progress, and deliver to milestones
- Good oral and written communication skills; ability to work remotely

**Preferred Technical Expertise and Skills:**

- Experience using Agile software development methodologies. Candidate should have experience with User stories, Product/Sprint backlogs and Agile ceremonies (sprint planning, daily stand up, backlog refinement, sprint demo and retrospective)
- 5 years' + experience as a mobile developer for Android and/or iOS
- Experience with UI design
- Experience with API integrations
- Knowledge of REST/JSON
- Knowledge of mobile app security best practices
- Experience with React, ReactNative, Native Android/iOS, Looper, Jenkins, Azure, API Manager (IBM)/API Layer model is a plus
- Experience in a large enterprise environment is a plus
